Chapter 1

NewSpace Companies

1.1 Goal

There are 2 goal for this repository.

1. To list all the NewSpace Companies Wikipedia has a pretty detailed list of the newSpace companies and what they do. But the list is not fully upto date. Normally I would edit and put in the details, but my University has proxy service for all web activities. Hence, my attempts are automatically blocked. I did create a google docs, but I think I'll phase out that doc.
2. To learn Doxygen At the end of the day, I'm an ERTS engineer. What better way to practice new tools than to work on my side projects?
